

THE COVERSUN MODULE

prestressed reinforced concrete Y-beam (or similar)

One of **Coversun's** features is easy installation. The Cappello Alluminio group's know-how has led to the production of a system requiring neither holes in the structure nor welds. Quick to install, structural solidity, and total insulation, for a superior quality product.

KEY

- 01** Clamp-on frame-guide sections, pre-painted aluminum **Coversun** structure.
- 02** Hot-galvanized metal trestlework substructure, pre-painted with thermosetting polyester powder.
- 03** Framed glass side window with pre-painted aluminum **Coversun** structure (fixed or movable/motorized).
- 04** Pre-painted aluminum **Coversun** structure frame for housing photovoltaic panels.
- 05** Micron photovoltaic panel.
- 06** Central water-tight thermal-barrier coupling seal.

Coversun installs photovoltaic panels
